

# Introduction to Debugging and Profiling in Python

“I feel fine! This can't be happening, not to me!”

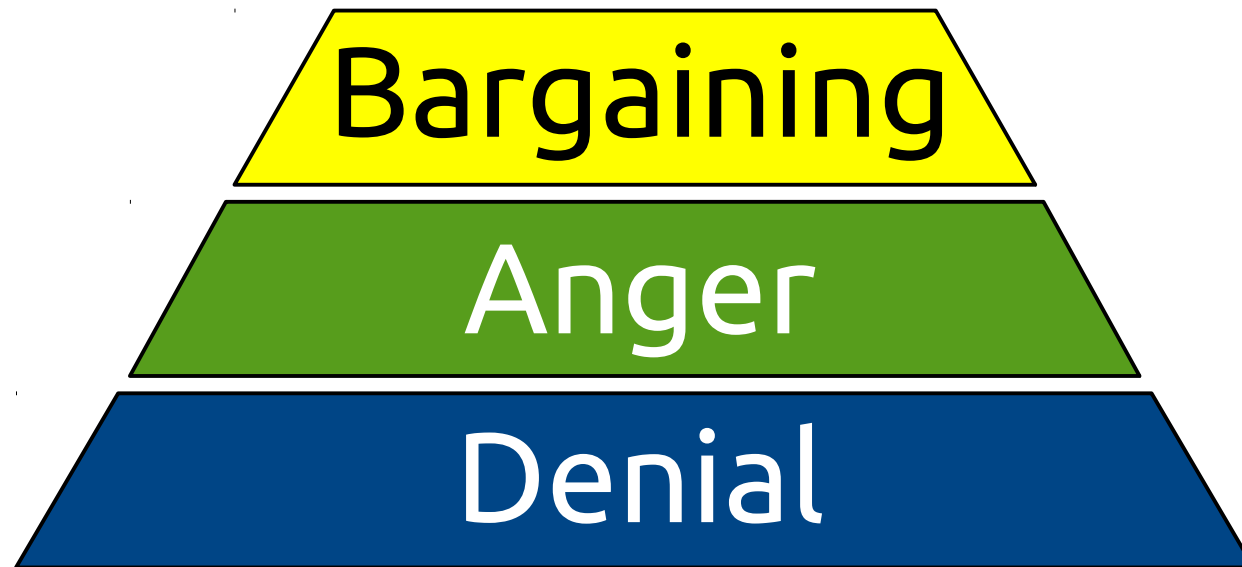

Denial

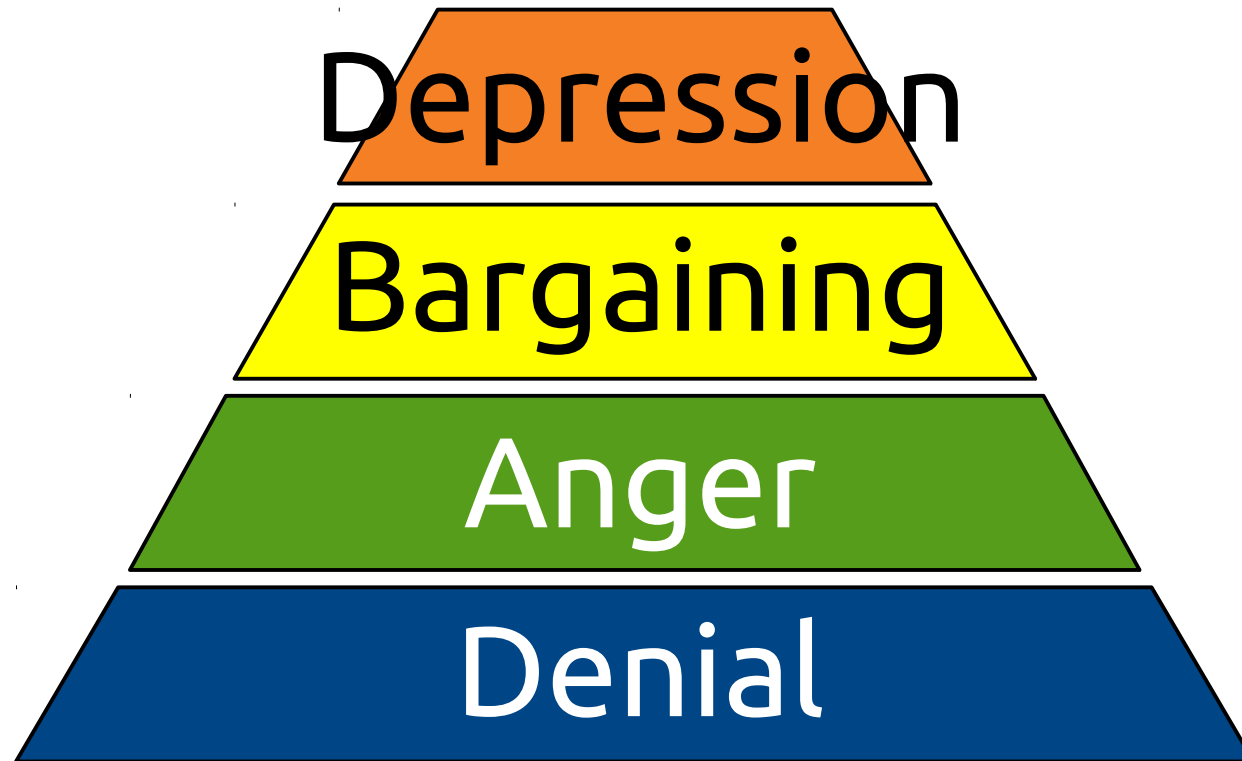

“Why me? It's not fair! Whose fault is this?”

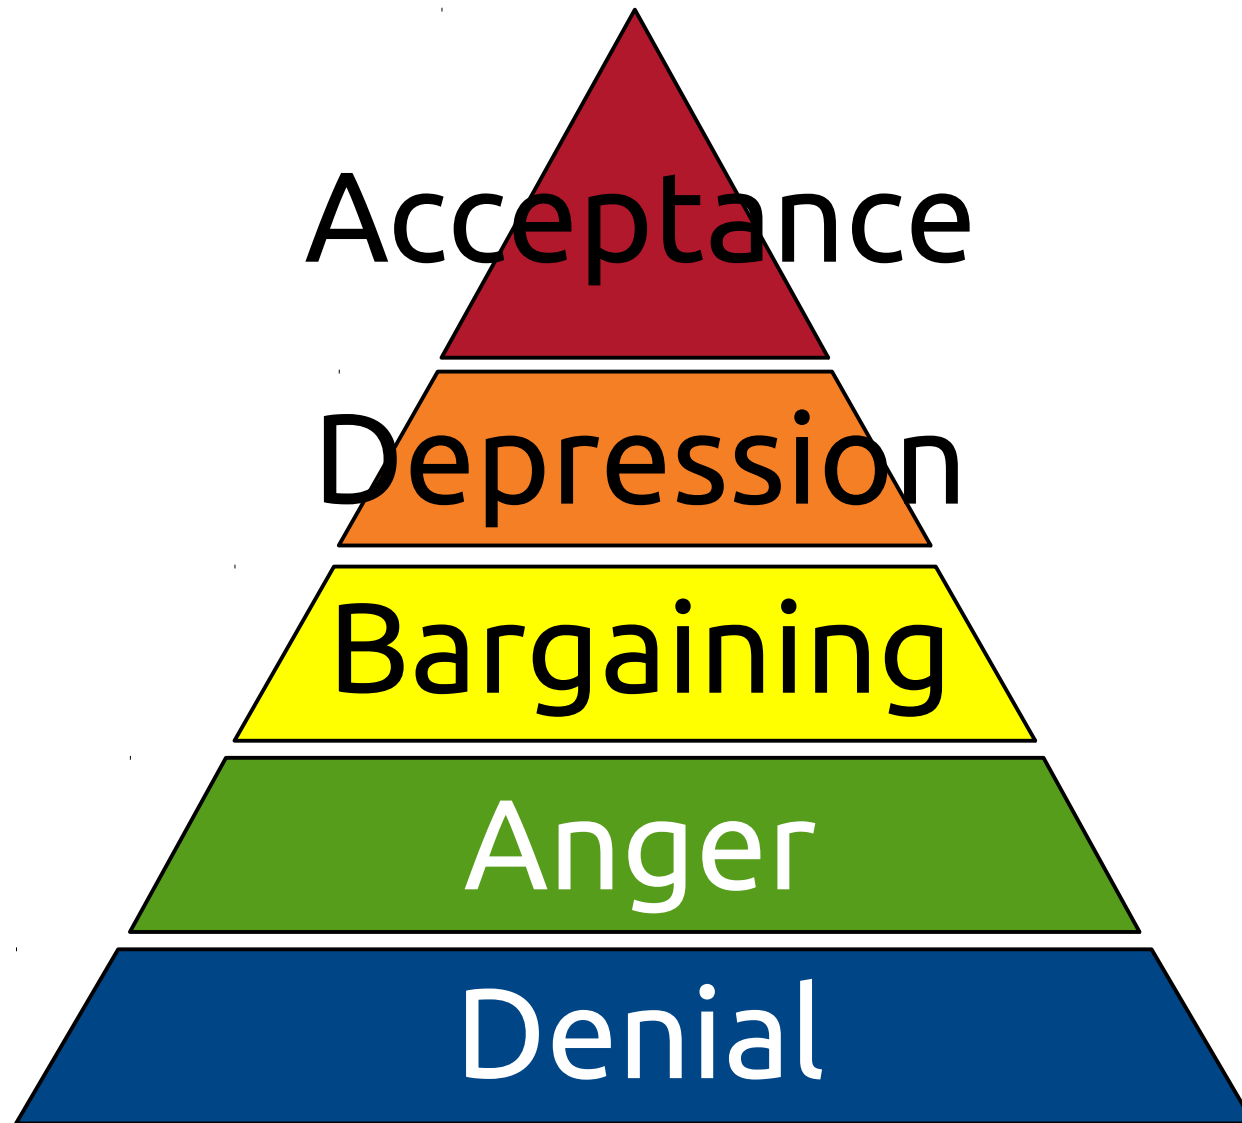

“I'll do anything, *anything*, for a few less bugs...”

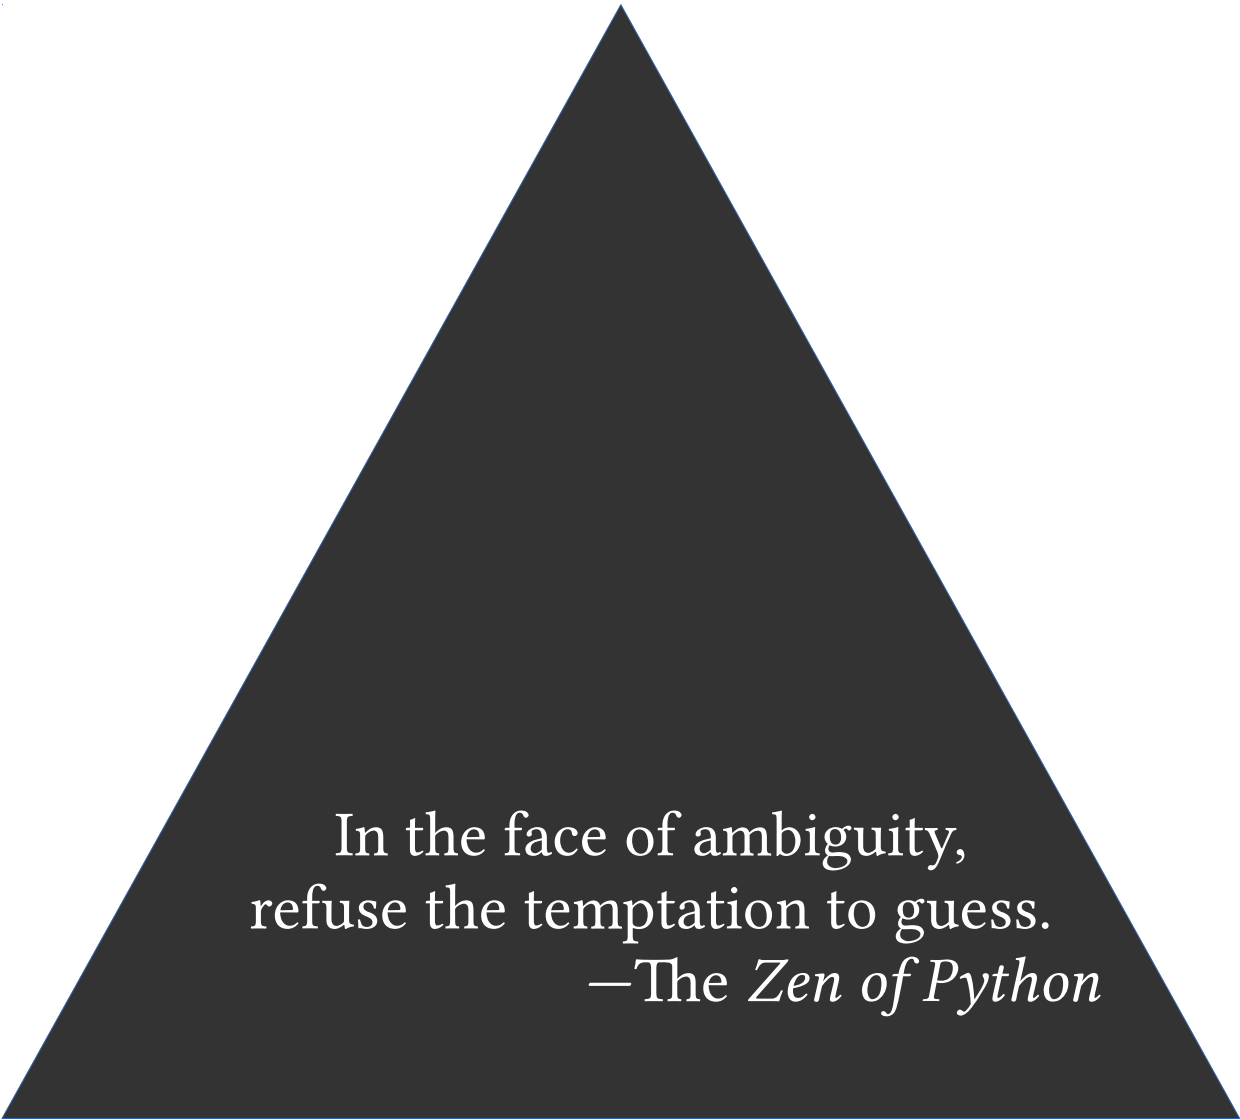

“What's the point of going on? My code is ruined.”

“It's going to be okay. I might as well prepare for it.”

In the face of ambiguity,  
refuse the temptation to guess.  
—The *Zen of Python*
